

Mark Clark Senior Software Engineer

✉ markc9821@outlook.com 📞 213-802-8533 📍 Austin, TX 78738 🔗 [linkedin.com/in/markc152](https://www.linkedin.com/in/markc152)

👤 Profile

Senior Software Engineer with 15+ years of experience designing, developing, and scaling web, mobile, and cloud-native applications using React, React Native, TypeScript, Node.js, Java, Python, and AWS. Experienced across SaaS, fintech, and healthcare domains, delivering secure, high-performance solutions that support business growth and improve user experience. Skilled in building scalable distributed systems, cross-platform mobile applications, and modern cloud architectures. Proven track record of optimizing application performance, integrating AI-powered solutions, and collaborating with cross-functional teams to deliver impactful products and measurable business outcomes.

💡 Skills

Programming Languages

JavaScript, TypeScript, PHP, Python, Java, C#, Ruby

Database

MongoDB, PostgreSQL, MySQL, SQLite, MSSQL, Redis

Cloud & Infrastructure

AWS, Azure, Digital Ocean, Google Cloud Platform, Docker, Kubernetes, Kafka

APIs & Architecture

REST APIs, GraphQL, Microservices, Distributed Systems

AI & Machine Learning Integration

AI Solutions, Model Integration, Data Pipelines, LLM

Frameworks & Libraries

React.js, React Native, Next.js, Angular, Vue.js, Node.js, Express.js, Nest.js, Django, Flask, FastAPI, CodeIgnitor, Laravel, Spring Boot, Ruby on Rails, .NET, Material UI, Tailwind CSS

Mobile Development

iOS, Android, Cross-Platform Mobile Development, Push Notifications

Healthcare & Biotech Systems

LIMS, Patient Portals, Mirth Connect, EHR, FHIR, HL7

Soft Skills

Leadership, Cross-functional Collaboration, Code Review, Problem Solving

🧰 Professional Experience

08/2022 – 05/2026

Nike, Senior Staff Software Engineer

- Led development of scalable web and mobile applications using React, React Native, TypeScript, Node.js, MongoDB, and AWS.
- Built cross-platform iOS and Android applications with React Native, accelerating feature delivery through a shared codebase.
- Designed and deployed cloud-native microservices using Node.js, AWS, Docker, Kubernetes, Kafka and GraphQL.
- Developed high-performance backend services and REST/GraphQL APIs using Node.js to support large-scale applications.
- Improved application performance through caching, database optimization, and monitoring tools, reducing response times by 25%.
- Integrated AI-powered features and LLM-based solutions to automate workflows and enhance user experiences.
- Collaborated with product, design, and engineering teams to deliver scalable solutions and drive business impact.

03/2020 – 05/2022

Explo, Senior Software Engineer

- Joined an early-stage startup and worked across frontend, backend, cloud infrastructure, and client-facing solutions.

- Developed web and cloud-based applications for healthcare, SaaS, and enterprise clients using React, TypeScript, Node.js, Express.js, Python, MongoDB, and AWS.
- Built and enhanced Laboratory Information Management Systems (LIMS) to support laboratory operations, sample tracking, and reporting workflows.
- Developed healthcare solutions integrating EHR systems using FHIR and HL7 standards to enable secure data exchange.
- Collaborated with cross-functional teams to deliver client solutions on time while maintaining high code quality and system reliability.
- Optimized application performance and cloud infrastructure, improving scalability, security, and operational efficiency.

06/2017 – 08/2022

Slack, Staff Software Engineer

- Led development of scalable web, mobile, and backend systems using React, React Native, TypeScript, Node.js, MongoDB, and AWS.
- Built frontend and mobile features using React, React Native, GraphQL, and REST APIs for millions of users.
- Designed and maintained cloud-native microservices using Node.js, Docker, Kubernetes, and AWS.
- Improved system reliability through monitoring, alerting, and fault-tolerant cloud architectures.
- Streamlined CI/CD pipelines and containerized deployments, reducing release cycles from days to hours.
- Integrated AI-powered features and LLM-based solutions to automate workflows and improve user experiences.
- Collaborated with product, design, and engineering teams to deliver scalable solutions and accelerate feature delivery.
- Mentored engineers, conducted code reviews, and promoted engineering best practices.

07/2014 – 06/2017

Slack, Senior Software Engineer

- Developed scalable application features using Java, Node.js frameworks integrated with REST and GraphQL APIs increasing user engagement.
- Built responsive frontend components using React and TypeScript improving UI performance scores.
- Optimized backend services by refining database queries and improving service architecture reducing processing time.
- Collaborated with product teams by gathering and translating requirements into technical implementations delivering major features on schedule.
- Demonstrated strong teamwork and communication by contributing to agile processes and cross-team initiatives improving team delivery predictability by 20%.

08/2011 – 06/2014

Paypal, Software Engineer

- Developed secure payment processing systems using Java and backend service architectures within large-scale financial platforms supporting 5M+ transactions per day.
- Improved system performance by optimizing algorithms and database interactions reducing transaction latency by 25%.
- Collaborated with cross-functional teams by translating business requirements into scalable technical solutions delivering critical payment features.
- Applied strong problem-solving and communication skills by resolving production issues and improving system stability reducing incident resolution time

Education

03/2007 – 06/2011

University of California, Berkeley, Bachelor's Degree in Computer Science
